

## Dedicated Data Connections

Your **own** piece of high-speed **fibre** to do with what you need!

Extend your fast moving business even further by travelling on your own super highway using Clarotech's network across South Africa.

Using our uncontended high-speed fibre network service, ClaroConnect, businesses can rely on a wide area network that assures responsiveness for end-users needing access to applications and other services hosted in the cloud or remotely to where they are physically located. ClaroConnect can be customised to meet each business's exact requirements for capacity, speed and reliability and then easily and quickly modified whenever those needs change.

### A private network developed to support all your needs and more!

- Single point of contact & accountability
- Multisite managed network solution
- Uncontended access to CaroCloud ensures responsive applications and services
- Customised and scalable to your needs
- Only pay for the internet bandwidth you need
- Quality of Service to prioritise your traffic
- High speed access
- Migrate your servers to virtual machines in the cloud
- Centralised next generation firewall options
- Inter-branch video conferencing
- Optional LTE backup service
- Customised packages available on request
